Professional Summary

Analytical, creative IT professional and Front-End Developer with a commendable track record in web development, applications, systems, database, page designs, scripting, coding programs, project management, and customer service. Proficient at operating diverse software in developing projects and formulating innovative solutions to technical issues. A self-starter and passionate individual with extensive technical knowledge, industry expertise, and organisational skills. Equipped with an innovative perspective on industrial designs, crafting illustrations, and other art aspects while possessing a robust work-ethic and excellent communication skills.

Selected Highlights

Web & Application Development

→ Developed various applications and programs in the academe (iO Academy) to fulfil a Full-Stack Developer position.

→ Created and produced a food delivery application by utilising React to provide a responsive design and dynamic page.

→ Programmed a collection app with PHP object-oriented programming for a list of cars from a relational database using MySQL.

Software Proficiency

→ Utilised diverse software in coding programs, developing systems/applications, and resolving system issues through applications.

→ Applied external API for the food delivery application while using React and Bootstrap for seamless and accurate functions.

→ Led the procedures in developing the system by populating the database with JSON from API and using SASS for page designs.

Project Management

→ Acquired a certification as Scrum Master in directing teams on different projects, activities, and other relevant programs.

→ Collaborated with associates and co-developers in designing systems, scripting, and establishing the entire user interface.

→ Functioned as a leader at Asda in supervising staff, training personnel, managing operations, and providing customer service.
